

Alex Fracazo

PRODUCT DESIGNER · ZERO TO ONE

+61 411 779 717 · fracazo@duck.com
linkedin.com/in/fracazo · github.com/fracazo · alexfracazo.com

Product designer who takes new ideas from zero to one, from research through to a working product. Built at **GitLab**, **Qantas**, **Vodafone** and **Telstra**. Took GitLab's in-product query language from research to launch, grew weekly users **33%**, and shipped my own code to production. Founded **BirthGuide**, live with paying users, built solo on Next.js, Supabase and the Anthropic SDK. Four years forward deployed into enterprise and federal government teams.

Focus: Zero to One · AI Products · Developer Tools · Design Systems
Stack: TypeScript · React · Next.js · Tailwind · Supabase · Anthropic SDK
Languages: Portuguese native, English professional, Spanish elementary · Australian and Brazilian citizen

EXPERIENCE

GitLab Senior Product Designer · Remote

Nov 2022 – Jul 2026 · **3 yrs 9 mos**

- Built **GLQL** (GitLab Query Language), an in-product query language for tracking work, from research to general availability. Interviewed customers, scoped with the product manager and engineering, and shipped production code via merge requests. Grew weekly users from 600 to 801, a **33% increase**, by surfacing it inside the editor at the moment of writing.
- Found site status, deployment and DNS problems in **GitLab Pages** through my own UX scorecards, designed the fix, and shipped it through another team as **eleven merge requests in one release**.
- Surveyed and ran usability studies on **AI code review** that exposed trust and control problems, then reframed the product around the author. The resulting writing assistant shipped to general availability and is still in the product.
- Established an **AI-assisted research and prototyping pipeline**: analysed anonymised product data, generated interview guides, synthesised transcripts, then produced user flows, wireframes and working responsive prototypes across desktop, tablet and mobile. Mentored designers across the design org and ran critiques.

Hireup Principal Product Designer · Sydney

Mar 2021 – Oct 2022 · **1 yr 8 mos**

- Discovered that **39.1% of clients were messaging inactive workers**, then introduced a worker availability system across iOS and Android with engineering. Connection rate rose from **3% to 5%**, response rate from **39.1% to 45.8%**, with **46% more inactive workers reactivated**.
- Streamlined the core booking flow, lifting booking rate **12%**.

Arq Group and Outware Mobile Forward Deployed Product Designer (Team Lead) · Sydney

Jul 2016 – Jun 2020 · **4 yrs**

Embedded with client product teams to take work from discovery through to launch. Mentored designers and established research practices across teams.

Qantas Entertainment app · Forward deployed by Arq Group

Redesigned the app to work before and after the flight, extending it beyond the on-board Qantas network. **Tripled advertising revenue** from partner offers, 225k to 675k, and raised the App Store rating from **2.1 to 4.5**.

Department of Home Affairs Electronic Travel Authority app, zero to one · Forward deployed by Arq Group

Investigated visa processing and data accuracy with Home Affairs and SITA staff, then reframed the problem from form design to data capture. Designed an iOS and Android flow that reads the passport chip over NFC and captures a live face image, removing manual entry. **Won Gold at the Sydney Design Awards**.

Telstra Design system · Forward deployed by Arq Group

Standardised components and usage guidance across product teams, cutting duplicated design and build effort on new projects.

Endeavour Group BWS app, zero to one · Forward deployed by Arq Group

Launched a liquor retail app on iOS and Android from concept, and coached the in-house design team through working directly with engineers.

Vodafone Senior Product Designer · Sydney

Jun 2015 – Aug 2016 · **1 yr 3 mos**

Created MyMix, a personalised prepaid plan builder, and instituted research and testing practices across the self-service team on web and native apps.

B2W Digital Senior Product Designer · Rio de Janeiro

Jun 2013 – May 2015 · **2 yrs**

Rebuilt the app as **Brazil's first for iOS 7**. Apple featured it in the App Store, and mobile revenue grew **ten times** the following year. Developed a responsive white-label platform for multiple store brands at LATAM's largest e-commerce company, and consolidated three native apps onto a single design system.

Artia Frontend Engineer · Joinville, Brazil

Sep 2009 – Jun 2011 · **1 yr 10 mos**

Programmed my own interface designs in Haml, Sass, Ruby on Rails and jQuery on an agile team.

Earlier: Bem Direto (2012–2013), first designer at Brazil's first real estate marketplace for agents · Smartia (2011–2012), Brazil's first car insurance comparison platform · Sitevip (2005–2009), front-end coder in an agency.

SKILLS

Front end	TypeScript · JavaScript · React · Next.js · Tailwind CSS · HTML · CSS
Platform	Supabase · PostgreSQL · Stripe · Vercel · Git
AI	Anthropic SDK · Claude Code · Cursor · Model Context Protocol (MCP) · Structured outputs · Evals and guardrails
Design	Figma · Design systems · Interaction design · Prototyping · WCAG 2 and APCA contrast
Research & analytics	User interviews · Usability testing · A/B testing · GA4 · Microsoft Clarity

EDUCATION AND PUBLICATIONS

d.MBA · MBA for Designers	2020
Nielsen Norman Group · UX Master Certificate	2021
Faber-Ludens Institute · Interaction Design, Brazil	2010–2012
