

I work end to end, from research and strategy through to a working product. At GitLab I paired with the senior product manager to define the roadmap for Knowledge, ran the customer research behind GLQL, took it from discovery to GA, grew adoption 33%, and shipped my own merge requests. Before that I founded and shipped two products solo.

PRODUCTS

BirthGuide · birthguide.com.au · 2026

Founded and shipped solo. Ran interviews with first-time parents and midwives, then reframed the category from printable template to labour communication tool after research showed the birth partner, not the parent, is the primary plan reader during active labour. Now expanding from a single tool into a guided program, where finishing unlocks a birth plan, an auto-generated partner cheat sheet and hospital bag list tailored to the plan, and a shareable birth site. Postpartum support in development. Set pricing and built the acquisition strategy around free tools and guides. Next.js, Supabase, Stripe.

Birth Plans · birthplans.app · 2026

A focused global birth-plan builder, kept separate from BirthGuide so one product stays a single-purpose tool while the other expands into the full pregnancy journey.

Triage Agent · github.com/fracazo/triage-agent

Support-triage agent in TypeScript built on a model proposes, code decides architecture. A deterministic policy module holds the final call, with adversarial eval sets, injection blocking, and confidence-based escalation.

Contrast Lab · [Raycast extension](#)

WCAG 2 and APCA contrast checking, pure TypeScript, published to the Raycast store.

Don Draper · [Agent Skill](#)

Creative-director critique agent built on the Agent Skills standard. Installs into Claude Code or OpenCode with one command.

EXPERIENCE

2022 – 2026 · Remote, global

GitLab

Senior Product Designer

Paired with the senior product manager to define the roadmap for Knowledge, covering Wiki, GLQL (GitLab Query Language), Pages, and text editors.

+33% adoption · shipped my own code

- Took GLQL from discovery to GA. Ran the customer interviews and validation, defined scope with the PM and engineering, and shipped my own code to production via merge requests. Adoption grew 33% with zero launch bugs.
- Ran usability studies and a survey on AI code review that exposed trust and control problems. The findings drove a full product pivot to an author-facing writing assistant.
- Drove the Wiki strategy to compete with Confluence. Shipped the sidebar redesign to production through code contributions and finalised the contextual comments system now in engineering development.
- Co-authored the GLQL launch content with the PM and engineering lead, published on the GitLab blog.

2021 – 2022 · Sydney

Hireup

Principal Product Designer

Australia's largest disability support marketplace, iOS and Android.

Connection rate 3% → 5% (+67% relative)

- Found through data analysis that 39.1% of clients were messaging inactive workers, then built the case for an availability visibility system. Shipped across iOS and Android: connection rate 3% to 5%, response rate 39.1% to 45.8%, and +46% inactive worker reactivations.
- Redesigned the core booking flow, +12% booking rate.

2016 – 2020 · Sydney

Arq Group and Outware Mobile

Lead Product Designer

Qantas, Woolworths, and NAB across mobile, web, and wearable. Mentored designers and established research practices.

+70% app downloads · Sydney Design Award

- Qantas Entertainment app redesign, end to end, +70% downloads.
- Australian ETA visa app, designed from 0 to 1, winner of the Sydney Design Award.

2015 – 2016 · Sydney

Vodafone

Senior Product Designer

Led UX for the self-service team across web and native apps, and established research and testing processes across multiple products.

2013 – 2015 · Rio de Janeiro

B2W Digital

Senior Product Designer

LATAM's largest e-commerce company. Built a responsive white-label platform for multiple branded stores and a design system that unified 3 native apps.

Earlier: Bem Direto (2012–2013), first designer at Brazil's first real estate marketplace for agents · Smartia (2011–2012), Brazil's first car insurance comparison platform · Artia (2009–2011), built my own UI in Haml, Sass, and Rails · Sitevip (2005–2009), front-end coder in a fast-paced agency.

SKILLS EDUCATION AND MORE

PRODUCT

Customer interviews, discovery, roadmap definition, scoping and prioritisation, pricing, positioning, adoption metrics

BUILD AND SHIP

TypeScript, React, Next.js, Tailwind CSS, Supabase, Stripe, Vercel, Git

AI

Claude Code, Cursor, Anthropic SDK, MCP, structured outputs, evals and guardrails

DESIGN

Interaction design, design systems, prototyping, usability testing, Figma

ANALYTICS

GA4, Clarity, cohort analysis, A/B testing

MBA

d.MBA, 2020

UX Master Certificate (UXMC)

Nielsen Norman Group, 2021

Interaction Design

Faber-Ludens Institute, Brazil, 2010–2012
