

Alex Fracazo

Product designer who ships production code, consumer and enterprise.

alexfracazo.com · fracazo@gmail.com · 0411 779 717 · Melbourne, Australia

I design and build end-to-end, from user research to production code, using AI-powered tools to move fast without losing craft. Most recently led design for GitLab's Knowledge platform as sole designer in an engineering-led group, growing feature adoption 33% and contributing code to production.

Experience

GitLab

2022 – 2026 · Remote, global

OUTCOME

+33% adoption, 0 bugs, code in production

Senior Product Designer · Sole designer, Knowledge team, reporting to Senior Director of Product Design

- Led **GLQL from research through GA launch**: 33% adoption growth, zero bugs, and shipped my own code to production via merge requests.
- Led the Wiki UX transformation: shipped the sidebar redesign to production through code contributions and finalised the contextual comments design system now in engineering development, positioning GitLab Wiki against Confluence.
- Ran usability studies and a Qualtrics survey on AI code review features that exposed trust and control problems. **Findings drove a full product pivot**: the team turned off live AI summary features and shipped an author-facing writing assistant instead.

Hireup

2021 – 2022 · Sydney

OUTCOME

Connection rate 3% → 5% (+67% relative)

Principal Product Designer · Australia's largest disability support platform

- Identified through data analysis that **39.1% of clients were messaging inactive workers**, dragging down platform-wide connection rates.
- Designed an availability visibility system across iOS and Android, validated through lean research and cohort experiments in Sydney and Melbourne. Lifted response rate from 39.1% to 45.8% and drove +46% inactive worker reactivations.
- Redesigned the core booking experience, achieving a +12% increase in booking rates.

Arq Group & Outware

2016 – 2020 · Sydney

OUTCOME

+70% app downloads, Sydney Design Award

Team Lead and Lead Product Designer

- Led product design across web, mobile, and wearable for Qantas, Woolworths, and NAB; managed designers and established research practices across teams.
- Led the Qantas Entertainment app redesign end-to-end, increasing downloads +70%. Designed the Australian ETA visa app, winner of the Sydney Design Award.

Vodafone

2015 – 2016 · Sydney

Senior Product Designer

- Led UX for the self-service team across web and native apps; established user research and testing processes across multiple products.

B2W Digital

2013 – 2015 · Rio de Janeiro

OUTCOME

1 design system, 3 apps unified

Senior Product Designer · LATAM's largest e-commerce company

- Designed a responsive white-label e-commerce platform supporting multiple branded stores; created an internal design system that improved consistency across 3 native apps.

Earlier: Bem Direto (2012–2013), first designer at Brazil's first real estate marketplace for agents, with A/B testing on core conversions · Smartia (2011–2012), Brazil's first car insurance comparison platform · Artia (2009–2011), designed and implemented my own UI in HamI, Sass, and Rails · Sitevip (2005–2009), front-end coder in a fast-paced agency.

Skills

DESIGN

UX research, product strategy, interaction design, design systems, prototyping, iOS and Android

ENGINEERING

Next.js, React, TypeScript, Tailwind CSS, Supabase, Stripe, Vercel, HTML/CSS, Git

AI TOOLS

Claude, Claude Code, Cursor, OpenCode

ANALYTICS

GA4, Clarity, cohort analysis, A/B testing
