mail fracazo@gmail.com
web www.alexfracazo.com

*Product designer who designs and builds, end-to-end, from research and strategy to a shipped product, with no hand-off between design and build. I use AI-assisted tooling to move fast without losing craft. Currently the sole product designer on GitLab's Knowledge platform in an engineering-led group, growing feature adoption **33%** and shipping code to production. Alongside that, I solo-built and shipped BirthGuide.com.au end-to-end. I do my best work on ambiguous, high-stakes problems with no design manager in the room.*

SKILLS

Design

UX research, product strategy, interaction design, design systems, prototyping

Engineering

Next.js, React, TypeScript, Tailwind CSS, Supabase, Stripe, Vercel, HTML/CSS

Nielsen Norman Group, 2021
Interaction · Research · Management specialties

MBA, Business education for designers

d.MBA, 2020

UX Design, Immersive Course

General Assembly, Sydney 2015

Major Degree, Interaction Design

Faber-Ludens Institute, Brazil 2010–2012

Bachelor's Degree, Graphic Design

Universidade Norte do Paraná, Brazil 2001–2005

WORK EXPERIENCE

GitLab

2022 – Present

Senior Product Designer

🌐 Worldwide Remote

Sole designer on the Knowledge team in an engineering-led group, reporting to the Senior Director of Product Design, owning Wiki, GLQL, Pages, and text editors.

- Led GLQL from research through GA launch: **33%** adoption growth, zero bugs, and shipped my own code to production via merge requests.
- Led the Wiki UX transformation, shipping the sidebar redesign to production through code contributions, and finalising the contextual comments design system now in engineering development.
- Ran usability studies and a survey on AI code review that exposed trust and control problems, driving a full product pivot to an author-facing writing assistant.

Hireup

2021 – 2022

Principal Product Designer

🇦🇺 Sydney, Australia (Remote within Australia)

Australia's largest disability support marketplace. Sole designer on the iOS and Android app team.

- Found through data analysis that **39.1%** of clients were messaging inactive workers, dragging down platform-wide connection rates.
- Designed an availability visibility system across iOS and Android that lifted connection rate from 3% to 5% (**+67%** relative), response rate to 45.8%, and drove **+46%** inactive worker reactivations.
- Redesigned the core booking experience, achieving a **+12%** increase in booking rates.

Arq Group & Outware Mobile

2016 – 2020

Team Lead + Lead Product Designer, UX/UI

🇦🇺 Sydney, Australia

Led product design across mobile, web, and wearable for Qantas, Woolworths, and NAB. Established research practices and mentored designers across teams.

- Led the Qantas Entertainment app redesign end-to-end (**+70%** downloads).
- Designed the Australian ETA visa app, winner of the Sydney Design Award.

Vodafone

2015 – 2016

Senior Product Designer

🇦🇺 Sydney, Australia

Led UX for the self-service team across web and native apps. Established user research and testing processes across multiple products.

ADDITIONAL

birthguide.com.au

Solo builder, 2026

Publication

"Build a new website in a few easy steps with GitLab Pages," GitLab Blog, 2025

Design Mentor

Springboard & CareerFoundry, 2020–2021

Coursify.me

Side project, 2013–2016

FEATURED PROJECT

BirthGuide 2026

 birthguide.com.au

A consumer birth-planning product for Australian first-time parents, designed and built solo, end-to-end, on Next.js, React 19, Supabase, and Stripe using AI-powered tools (Claude, Claude Code). Parents answer a guided questionnaire and receive an interactive birth plan with a QR code midwives scan, plus a printable partner summary.

- Reframed the category from 'printable template' to 'labour communication tool' after research revealed the partner is the primary plan reader during active labour.
- Validated real usage with Clarity session recordings; built free tools, guides, and an AI chat assistant as an organic acquisition strategy.

WORK EXPERIENCE / CONTINUED

B2W Digital

2013 – 2015

Senior Product Designer, UX/UI

 Rio de Janeiro, Brazil

LATAM's biggest e-commerce company. Led product design for native iOS and Android apps and responsive web across multiple store brands.

- Designed a responsive white-label e-commerce platform supporting multiple branded stores.
- Led ideation, design and marketing of new iOS and Android apps and mobile websites.
- Created an internal design system that improved consistency across 3 apps.

Bem Direto

2012 – 2013

Product Designer, UX/UI

 Rio de Janeiro, Brazil

First designer on the team. Designed the entire UX from scratch for Brazil's first real estate marketplace for agents, across web and native apps.

- Implemented A/B testing measuring core actions against click-through and conversion metrics.

Smartia

2011 – 2012

User Interface Designer

 Rio de Janeiro, Brazil

Brazil's first car insurance comparison platform. Designed visuals for web and native apps with expertise across both design and coding, bridging Product/Design and Engineering teams.

Artia

2009 – 2011

Front-end Designer

 Santa Catarina, Brazil

First designer on an agile multidisciplinary team. Designed and built the UI from scratch, implementing my own designs in Haml, Sass with Ruby on Rails and jQuery.

Sitevip Digital Agency

2005 – 2009

Web Designer

 Mato Grosso, Brazil

Frontend coder (HTML/CSS/jQuery). Designed websites and web banners in a fast-paced agency.
