Australia, 2015

Major Degree - Interaction Design

Faber-Ludens Institute for
Interaction Design, Brazil
2010-2012

Bachelor's Degree of Graphic Design - Diploma

Universidade Norte do Paraná,
Brazil 2001-2005

Product designer who designs and builds, end-to-end, from research and strategy to a shipped product. I work with no hand-off between design and build, using AI-assisted tooling to move fast without losing craft. Currently the sole product designer on GitLab's Knowledge platform in an engineering-led group, growing feature adoption 33% and shipping code to production. Alongside that, I solo-built and shipped BirthGuide.com.au end-to-end. I do my best work on ambiguous, high-stakes problems with no design manager in the room.

Work experiences

GitLab

Senior Product Designer (2022 • Present)

🌐 Worldwide Remote

Sole designer on the Knowledge team in an engineering-led group, reporting to the Senior Director of Product Design, owning Wiki, GLQL, Pages, and text editors.

- Led GLQL from research through GA launch: 33% adoption growth, zero bugs, and shipped my own code to production via merge requests.
- Led the Wiki UX transformation, shipping the sidebar redesign to production through code contributions, and finalising the contextual comments design system now in engineering development.
- Ran usability studies and a survey on AI code review that exposed trust and control problems, driving a full product pivot to an author-facing writing assistant.

Hireup

Principal Product Designer (2021 • 2022)

🇦🇺 Sydney / Australia (Remote within Australia)

Australia's largest disability support marketplace. Sole designer on the iOS and Android app team.

- Found through data analysis that 39.1% of clients were messaging inactive workers, dragging down platform-wide connection rates.
- Designed an availability visibility system across iOS and Android that lifted connection rate from 3% to 5% (+67% relative), response rate from 39.1% to 45.8%, and drove +46% inactive worker reactivations.
- Redesigned the core booking experience, achieving a +12% increase in booking rates.

Arq Group & Outware Mobile

Team Lead + Lead Product Designer UX/UI (2016 • 2020)

🇦🇺 Sydney / Australia

Led product design across mobile, web, and wearable for Qantas, Woolworths, and NAB. Established research practices and mentored designers across teams.

- Led the Qantas Entertainment app redesign end-to-end (+70% downloads).
- Designed the Australian ETA visa app, winner of the Sydney Design Award.

Vodafone

Senior Product Designer (2015 • 2016)

🇦🇺 Sydney / Australia

Led UX for the self-service team across web and native apps. Established user research and testing processes across multiple products.

Work experiences - part 2

B2W Digital

Senior Product Designer UX/UI (2013 - 2015)

 Rio de Janeiro / Brazil

LATAM's biggest e-commerce company. Led product design for native iOS and Android apps and responsive web across multiple store brands.

- Designed a responsive white-label e-commerce platform supporting multiple branded stores.
- Led ideation, design and marketing of new iOS and Android apps and mobile websites
- Created an internal design system that improved consistency across 3 apps.

Bem Direto

Product Designer UX/UI (2012 - 2013)

 Rio de Janeiro / Brazil

First designer on the team. Designed the entire UX from scratch for Brazil's first real estate marketplace for agents, across web and native apps.

- Implemented A/B testing measuring core actions against click-through and conversion metrics.

Smartia

User Interface Designer (2011 - 2012)

 Rio de Janeiro / Brazil

Brazil's first car insurance comparison platform. Designed visuals for web and native apps with expertise across both design and coding, bridging Product/Design and Engineering teams.

Artia

Front-end Designer (2009 - 2011)

 Santa Catarina / Brazil

First designer on an agile multidisciplinary team. Designed and built the UI from scratch, implementing my own designs in HamI, Sass with Ruby on Rails and jQuery.

- Implemented my own design writing code using HamI and Sass.
- Engaging in continuous design integrated with version control systems.

Sitevip Digital Agency

Web Designer (2005 - 2009)

 Mato Grosso / Brazil

Frontend coder HTML/CSS/jQuery. Designed websites and web banners in a fast-paced agency.

Projects

BirthGuide

2026

 birthguide.com.au

A consumer birth-planning product for Australian first-time parents, designed and built solo, end-to-end, on Next.js, React 19, Supabase, and Stripe using AI-powered tools (Claude, Claude Code). Parents answer a guided questionnaire and receive an interactive birth plan with a QR code midwives scan on their phone, plus a printable partner summary.

- Reframed the category from 'printable template' to 'labour communication tool' after research revealed the partner is the primary plan reader during active labour.
- Validated real usage with Clarity session recordings, and built free tools, guides, and an AI chat assistant as an organic acquisition strategy.
